

The Runway Project - Andrew's Ave. Pasay City, Metro Manila, Philippines

Activity
Supply and Supervision during
Installation of TETRON CD® Pot
Bearings

Description:

The Runway is a construction of a connecting bridge that will serve as an access way for tourist and locals from NAIA Terminal 3 to Resorts World area. It includes a tail bridge, an Iconic bridge which is the main feature of the structure. Freyssinet supervised the installation of TERON CD® Pot Bearings between the coping beams and the steel girders of the tail bridge.

Client : Travellers International Hotel Group

Subsidiary : Freyssinet International Manila, Inc.

Date Started : 10/2015

Date Finished: 11/2015

Freyssinet's Scope:

Freyssinet supplied and supervised the installation of TERON CD®/FX (Fixed) and TERON CD®/GL (Free Sliding) pot bearings for the Iconic Bridge. The bearings were installed to transmit loads and rotation due to dynamic loadings that are occurring on the structure.
